

Arete

D329

Minimalist design with a futuristic edge.

The Designer

Design Concept - Möbius Strip

The inspiration for Arete's design comes from the Möbius strip. The armrests present an elegant curve with continuous twists, seemingly drawing an infinite loop in motion. The streamlined lines enhance both the visual appeal and structural stability. As the viewing angle changes, the curves of the armrests appear to flow, evoking endless imagination.

Tilt function

The chair can effortlessly recline and bounce back with your movements, creating a sensation of floating in the air. The free tilt function requires no frequent adjustments, allowing you to focus on your work without being distracted by the chair's position.

- The backrest can recline up to 115 degrees.

Fashionable Colors

Arete's attractive color combinations brighten up the office space and infuse it with energy.

Soft support

The soft padded backrest is ingeniously designed, when you sit down, it naturally conforms to the curve of your waist, providing a soft and comfortable support. The softness and texture of the padded backrest make the whole sitting posture feel like being gently enveloped, enhancing the pleasant and relaxing experience during work or rest.

Vibrant Office Space

This chair, with its modern and minimalist design and dynamic curves, perfectly embodies the energy and style of a young company. Its unique shape and bold color choices not only showcase the company's modern image but also add a personalized and vibrant touch to the office space.
